Directions : Question No. **34** to **40** : Read the following passage carefully and answer questions given below it.

The hope cherished immediately after the Second World War, that one world would emerge out of it, had receded. Instead, there arose two politico-military blocs at seemingly irreconcilable enmity with each other, headed by the USA and the USSR. The great danger was that these two blocs might clash, dragging the rest of the world into a nuclear war and total destruction.

There are some critics who think that Nehru's concern for world peace was exaggerated. But they do not realize how close mankind was to a World War in the fifties on more than one occasion. For instance, in 1950, during the Korean War, when General MacArthur unauthorizedly crossed the 38th Parallel into North Korea and carried the war right up to the Chinese frontier, and China intervened and started mowing down American troops, there was a cry in the USA for preemptive use of the atom bomb against China. Then, prodded by Nehru, British Prime Minister Attlee flew to the USA to dissuade President Truman from taking any such disastrous step.

It might be argued that it would have been a good thing if China had been taught a lesson before it had developed the atom bomb. But at that time, China and the USSR were bound by a fraternal alliance and if China became the victim of an atomic attack, it would have been impossible for the USSR to keep aloof. In other words, it would have meant the Third World War and the destruction of civilization.

Apart from his concern for world peace, there were doubtless other factors which impelled Nehru to adopt a policy of non-alignment. Geographically India was too big, and historically too great, to be the hanger-on of any other State, however powerful. Economically it would have been foolish on the part of India, which had in view a gigantic policy of national reconstruction, to put all the eggs in one basket. Philosophically India had, from time immemorial, extended its tolerance to rival sects, rival creeds and rival religions. 'There was no Cold War', said Nehru, in 'Ashoka's heart'. Our policy of non-alignment was a factor which contributed to the alleviation of tensions between the rival blocs and the gradual demise of the Cold War. It is a matter for satisfaction that one Great Power, at any rate, the USSR, has, for the last so many years, understood, appreciated and even underwritten our policy of non-alignment.

- 34.** In the above passage it is said, "In other words, it would have meant the Third World War and the destruction of civilisation". What does the word 'it' mean?
- (1) Attack of US troops on China
 - (2) USSR's neutrality
 - (3) The USSR's plunging into the war
 - (4) China's attack on the US troops
- 35.** What made China intervene in Korean War?
- (1) America's invasion on Korea
 - (2) Arrival of American troops up to Chinese border
 - (3) General MacArthur's unauthorized participation in the War
 - (4) None of these

- 36.** About Nehru's concern for World Peace, the author of the passage has
- (1) defended the critics
 - (2) taken a neutral stand
 - (3) strongly justified it
 - (4) termed it as exaggerated
- 37.** Which of the following is not referred to as the probable effect of use of atom bomb against China?
- (1) Destruction of civilization due to World War III
 - (2) Loss of large number of lives and property
 - (3) It would have resulted in the Third World War
 - (4) China and the USSR would develop fraternal bonds between them
- 38.** Immediately after the World War II there was a feeling that

 - (2) the optimism cherished during the war will be realized
 - (3) the world would be dragged into a Third World War

- 39.** Which of the following is the result of India's adopting non-alignment policy?
- (1) Tolerance to rival creeds, sects and religions
 - (2) Eradication of Cold War started by Ashoka

 - (4) Lessening the tension between rival blocs
- 40.** Which of the following additional considerations led Nehru to adopt the policy of non-alignment?
